IN THE CLAIMS

A1 Please amend claims 1-9 by rewriting same to read as follows.

--1. (Amended) An information processing apparatus comprising:

receiving means for receiving data when [inherent or] a specific calling number of [an] the information processing apparatus is dialed by any other information processing apparatus [so that the information processing apparatus is called];

memory means for storing the data received by the receiving means; and

display control means for controlling a display of a picture [prepared by] based on the data stored by the memory means.

--2. (Amended) [An] The information processing apparatus as set forth in claim 1,

wherein the receiving means is a pocket bell receiver.

-- 3. (Amended) [An] The information processing apparatus as set forth in claim 1,

wherein the data is Electronic Program Guide (EPG)

information.

--4. (Amended) An information processing method comprising:

a receiving step of receiving data when [intrinsic or] a specific calling number of an information processing [appartus] apparatus is dialed by any other information processing apparatus [so that the information processing apparatus is called];

a memory step of storing the data received at the receiving step; and

A1 a controlling step of controlling, by display control means, a display of a picture [prepared by] based on the data stored at the memory step.

--5. (Amended) An information providing medium for providing a program [which can be processed] for processing by computer, [which executes] the processing including:

a receiving step of receiving data when [intrinsic or] a specific calling number of an information processing [appartus] apparatus is dialed by any other information processing apparatus [so that the information processing apparatus is called];

a memory step of storing the data received at the receiving step; and

a controlling step of controlling, by display control means, a display of a picture [prepared by] based on the data

stored at the memory step.

--6. (Amended) An information processing apparatus comprising:

calling means for calling any other information processing apparatus having [intrinsic or] a specific calling number by dialing the calling number; and

transmitting means for transmitting data to the other information processing apparatus called by the calling means.

--7. (Amended) [An] The information processing apparatus as set forth in claim 6,

wherein the data is Electronic Program Guide (EPG) information and is prepared [every one] for each broadcast program.

--8. (Amended) An information processing method comprising:

a calling step of calling any other information processing apparatus having [intrinsic or] a specific calling number by dialing the calling number; and

a transmitting step of transmitting data to the other information processing apparatus called at the calling step.

--9. (Amended) An information providing medium for providing a program [which can be processed] for processing by computer, [which executes] the processing including:
